

FLEETWOOD Windows and Doors

MULTI-SLIDE GLASS DOORS

Important Warranty Information

*****DISCLAIMER OF WARRANTY*****

Warranty is void unless the installation is performed per factory published instructions, and by an Authorized Dealer or an agent approved by the Authorized Dealer. In either case, the purchasing dealer assumes responsibility for insuring a proper installation. If the installation does not meet the criteria, or if the product is used in an application other than for which it was designed, the multi-slide door is sold without warranty, expressed or implied, including without limitation the implied merchantability and fitness for a particular purpose.

PLEASE NOTE: THE Series 1050 AND Series 3050 MULTI-SLIDE DOORS ARE DESIGNED FOR INTERIOR USE.

Bent doors may require field corrections and modifications to achieve adequate operation. This requires the installer to have experience in both engineering and structural design. Tracks must be carefully installed to the EXACT ordered radius, as well as not to alter the specified design radius. Incorrect installations often result where the anchors or shims cause ‘twists’ in the track – preventing the panels from rolling or operating correctly. During installation, the bend of the head and sill tracks should be confirmed at each anchor location. ‘Twisting’ also sometimes occurs when fastening the jambs to the head and sill tracks. See installation instructions for additional guidelines.
